High Technology Management

Distance learning now days is pivotal for students. We have encountered a global lockdown, but we appeared to be ready! Welcome our online summer school Hi-Tech Management!

Students with different backgrounds will get new knowledge and skills of hi-tech enterprises' management. During the studies, you'll be working on a group hi-tech/digital project with mates from different continents.

In real-time mode you will visit modern innovative companies and leading laboratories such as Nanosatellite department or mysterious Magnetic power laboratory.

But this will be not regular online course! You'll experience a real summer school and will be feeling like you are in Russia! We will take you to Space museum, Stalin's bunker, walk with you along historical streets and show the most beautiful places of the city.

Our friendly team, lectures, entrepreneurs, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it. Certificate on 4ECTS is provided.

Russian Language and Culture

Welcome to our online summer school Russian Language and Culture! The school provides a total feeling of presence in Russia. Unlike other platforms, we present the program that will give not only studies. We will take you to the beach, walk with you along vivid streets and show the most beautiful places of the city, visit Space museum, Stalin's bunker, other exclusive sites of Samara.

Along with everyday language classes, the school offers courses on history and culture of Russia, master classes on making Russian food or souvenirs.

The school is held in English. The program is constructed so that everyone can learn and easily improve his/her Russian!

Our friendly team, lectures, entrepreneurs, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it.

Certificate on 4ECTS is provided.

Space Materials and Technologies

The development of space research is a priority around the world. Humanity has always dreamed of near and long-distance flights into space and to other planets of the solar system.

Technology created for space concentrates everything the most advanced, from design decisions to the choice of new materials and technologies. While designers can find technical solutions with the help of computer modeling, the implementation of these solutions requires the development of new materials and innovative technologies.

The university is one of the top-10 universities in Russia.

With advanced experience, Samara University organizes a two-week on-line summer school "Space Materials and Technologies". One of the most outstanding scientists will lead you online to the insights of laboratories and show you machines and satellites that were created here in Samara University and now are applied all over the world.

Certificate on 4ECTS is provided.

SUMMER SCHOOL

Online program

Deadline: 10 July 2020

Dates:

10 August 2020 – 21 August 2020

COURSES

- Mystery of space materials
- Methods of materials testing
- Modern foundry
- Special types of sheet stamping
- Additive Technology
- Modern welding processes
- Machining of hardly deformable alloys
- Satellites overview

FORMAT

- Live studies
- Live exursions
- Records available for 4 months
- Support 24/7
- E-certificate

TUITION FEES

250\$

Additive Manufacturing

The school program is suitable for students and engineers interested in additive manufacturing for real industrial applications. Experience yourself in 3D modeling! Design your own product! Drive innovation at your organization or accelerate your career with additive manufacturing! Learn how to select 3D printing process and material for a best profit performance!

You will explore each of the commercial AM technologies and understand their principle method of operation, materials compatibility, and application potential. Along with studies, you will get a rich cultural program that will make you feel like you are in Russia. Our team has prepared a wonderful journey to Russian cultural and social life.

Certificate on 4ECTS is provided.

SUMMER SCHOOL

Online program

Deadline: 10 July 2020

Dates:

18 August 2020 – 29 August 2020

COURSES

- Introduction to AM
- Additive manufacturing processes
- Rapid prototyping
- Cost analysis of AM
- Benefits of AM
- Digital modeling
- Practical cases and applications

FORMAT

- Live studies
- Live exursions
- Records available for 4 months
- Support 24/7
- E-certificate

TUITION FEES

250\$

ONLINE SUMMER SCHOOLS 2020

**SUMMER
SCHOOL**

High Technology Management

(02 July – 16 July)

(23 July – 06 August)

Create an innovative hi-tech project with your team!

Russian Language and Culture

(02 July – 16 July)

(05 August – 19 August)

Successful Russian language study is the study with native speakers! Meet native speakers, find out more about Russian culture and Russian people's set of mind.

International Law

(23 July – 06 August)

International Law School is focused on recent developments in the field of International Law, and guide students through the central debates within the sphere.

Space Materials and Technologies

(10 August – 21 August)

Advances in materials science and space technology go further and are successfully used in all industries: metallurgy, automotive, electrical, oil and gas and others.

Additive Manufacturing

(18 August – 29 August)

Experience yourself in 3D modeling of aerospace equipment!
